Art Unit: 1652

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-3 and 6-8, drawn to a NF- κ B activating serine/threonine kinase.

Group II, claims 4 and 5, drawn to a gene encoding a NF- κ B activating serine/threonine kinase.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the only technical feature shared by groups I and II is a NF- κ B activating serine/threonine kinase, however this does not constitute a special technical feature as defined by PCT Rule 13.2 as such a NF- κ B activating serine/threonine kinase was taught in the prior art. See Cao et al. or Zandl et al., References AA and BC of applicant's PTO-1449 respectively.

Art Unit: 1652

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
